Zygor Guide (Free and up2date)

Who can not grasp the concept of protecting a premium account with Zygor and limiting exposure for people that account is being shared with.

People are never going to learn that sites like Zygor Guides, Dugi, and other premium site actively search out accounts that leak and share the guides and close them down thus cutting off OUR SOURCE OF CURRENT UPDATES! They use methods much like Whoknowsit did by embedding an encrypted tag somewhere with your username or account number so they can trace the leak back to the account. Just as Whoknowsit did.

A handful of us donated to Whoknowsit to so he could buy ALL the upgraded guides for MoP for all of us. That was an investment into THIS community not into torrents or into any other. We want it to remain safe for us to continue to use. Whoknowsit is smart enough to know what to look for to take out Zygor's tracking info, but he knows he is NOT perfect. That is why he is STILL careful.

Sadly you guys are not, he warned you all about the rules. The donators all agree to them as well. You didn't believe that he could do it, that he would not find out. Guess what, He did. Just like he did before when this happened and he gave proof. All involved denied, it sounded like. He had the proof.

Now he's closing his project yet again. Leaving us all in the dark. Thanks to the few that have to "big men" in the torrent scene. I just hope that someone else comes along that knows what Whoknowsit does and is willing to put up with the egos and the BS in the scene to share the guides we all enjoy. Because all I've seen so far are a bunch of people stealing Whoknowsit's research and the donators' wishes to keep it in THIS scene and safe for THIS SCENE, who don't know what they are doing.
